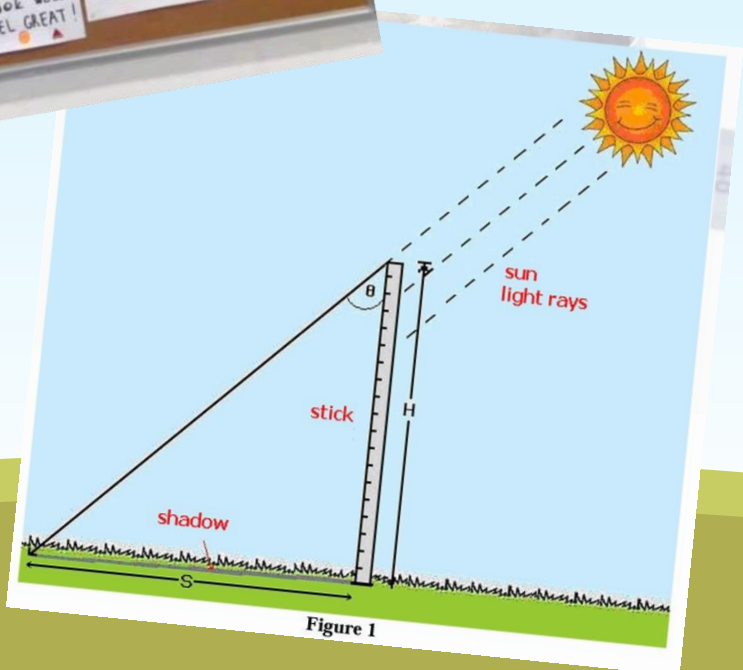

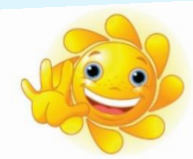

Figure 1

Hi, guys!!!!

My name is **the Sun** and I am a star; that means I am super hot. I live in space. Space is really big and you can't imagine how big.

There are weird space things that spin around me. They are called planets. There are eight of them. The first four of them are pretty small. The closest one to me is grey and it is called **Mercury**. After it comes **Venus** and it is orange. Then comes **Earth**. Earth's colors are green and blue. This one is special because funny little creatures live on it and they are called humans. Oh, wait, that's you! Sorry I called you funny. The last of the small ones is **Mars**. Mars is pale yellow.

HVALA NA PAŽNJI! 😊
