

ETWINNING SEMINAR

"FUTURE CITIZENS AND AI HAND IN HAND"

30.10.-1.11.2025 | TALLINN, ESTONIA

Description: The seminar will focus on using technology for learning - more specifically, how to incorporate AI in everyday schoolwork. During the hands-on workshops different tools and best practices will be shared to inspire and show how each teacher can use AI in their lessons and eTwinning projects. The seminar will also be covering eTwinning annual theme "Citizenship education: celebrating what unites us".

Target group: Primary/secondary school (students aged 7-12), beginners and intermediate users in eTwinning

Seminar language: English

Please note that participants should be able to communicate and plan a project together with partners in English!
